

Xtrackers MSCI Asia Pacific ex Japan Hedged Equity ETF (DBAP)

4th quarter 2017

Strategy

Investors may be unaware of a 'hidden risk' to their portfolios—currency exposure—that can significantly impact risk and performance. To help mitigate currency risk and potentially benefit from the growth opportunities provided by developed and emerging economies in the Asia-Pacific region (excluding Japan), consider Xtrackers MSCI Asia Pacific ex Japan Hedged Equity ETF (DBAP). DBAP, seeks to provide pure and balanced exposure to 13 countries in the Asia-Pacific region (excluding Japan), may help investors mitigate the effects of fluctuations between the U.S. dollar and non-U.S. currencies.

ETF performance and index history (from 10/1/13 to 12/31/17)

Source: Deutsche Asset Management. Includes reinvestment of all distributions.

ETF performance (12/31/17)

	3-months	1-year	3-year	5-year	Since ETF Inception
ETF (at NAV)	6.05%	28.59%	8.89%	—	8.10%
Market price returns	5.55%	29.02%	8.59%	—	8.00%
MSCI Asia Pacific ex Japan US Dollar Hedged Index	6.34%	30.06%	9.60%	—	8.77%
MSCI Asia Pacific ex Japan Index	7.93%	36.99%	9.84%	—	8.12%

Performance quoted represents past performance and does not guarantee future results. Investment returns and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. To obtain the most recent month-end performance data visit www.Xtrackers.com or call 855-329-3837.

Indexes are unmanaged; you cannot invest in an index. Index performance is gross of fees and assumes dividend reinvestment. Inclusion of fees would have reduced returns.

¹ NAV, or net asset value, usually determined at 4:00 p.m. Eastern Time on each day that the New York Stock Exchange is open for trading, and is calculated by dividing the ETF's total assets less total liabilities by the number of fund shares outstanding.

² The 30-Day SEC Yield is based on a 30-day period and is computed by dividing the net investment income per share earned during the period by the maximum offering price per share on the last day of the period.

³ Price-to-book ratio is a valuation ratio of a stock's market value compared to its book value.

⁴ Price-to-earnings ratio (P/E) is a stock's current price divided by the company's trailing 12-month earnings per share from continuous operations.

⁵ Dividend yield is a weighted-sum of the annualized dividends of the index components divided by the most recent index value. Annualized dividends are determined using a sum of all dividend announcements during the previous 12 months. Dividend yield is that of the MSCI Asia Pacific ex-Japan Index and is the rate of income generated by a stock in the form of dividends. The dividend yield of the index should not be considered the dividend yield of the fund.

Shares are not individually redeemable, and owners of Shares may acquire those Shares from the Fund, or tender such Shares for redemption to the Fund, in Creation Units only.

Carefully consider the fund's investment objectives, risk factors, and charges and expenses before investing. This and other information can be found in the fund's prospectus, which may be obtained by calling 1-855-DBX-ETFS (1-855-329-3837), or by viewing or downloading a prospectus from www.Xtrackers.com. Read the prospectus carefully before investing.

Nothing contained herein is fiduciary or impartial investment advice that is individualized or directed to any plan, plan participant, or IRA owner regarding the advisability of any investment transaction, including any IRA distribution or rollover.

Risks:

Investing involves risk, including the possible loss of principal. Stocks may decline in value. Foreign investing involves greater and different risks than investing in U.S. companies, including currency fluctuations, less liquidity, less developed or less efficient trading markets, lack of comprehensive company information, political instability and differing auditing and legal standards. Emerging markets tend to be more volatile and less liquid than the markets of more mature economies, and generally have less diverse and less mature economic structures and less stable political systems than those of developed countries. The fund's use of forward currency contracts may not be successful in hedging currency exchange rates changes and could eliminate some or all of the benefit of an increase in the value of a foreign currency versus the U.S. dollar. Funds investing in a single industry, country or in a limited geographic region generally are more volatile than more diversified funds. Investing in derivatives entails special risks relating to liquidity, leverage and credit that may reduce returns and/or increase volatility. Performance of the Fund may diverge from that of the Underlying Index due to operating expenses, transaction costs, cash flows, use of sampling strategies or operational inefficiencies. An investment in this fund should be considered only as a supplement to a complete investment program for those investors willing to accept the risks associated with the fund. Please read the prospectus for more information. See the prospectus for details.
