

Xtrackers MSCI Japan Hedged Equity ETF (DBJP)

4th quarter 2017

Strategy

Xtrackers MSCI Japan Hedged Equity ETF (the "ETF") seeks investment results that correspond generally to the performance, before fees and expenses, of the MSCI Japan U.S. Dollar Hedged Index (the "Index"). The Index is designed to provide exposure to Japanese equity markets, while at the same time mitigating exposure to fluctuations between the value of the U.S. dollar and Japanese yen.

Performance quoted represents past performance and does not guarantee future results. Investment returns and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. To obtain the most recent month-end performance data visit www.Xtrackers.com or call 855-329-3837.

Indexes are unmanaged; you cannot invest in an index. Index performance is gross of fees and assumes dividend reinvestment. Inclusion of fees would have reduced returns.

¹ NAV, or net asset value, usually determined at 4:00 p.m. Eastern Time on each day that the New York Stock Exchange is open for trading, and is calculated by dividing the ETF's total assets less total liabilities by the number of fund shares outstanding.

² The 30-Day SEC Yield is based on a 30-day period and is computed by dividing the net investment income per share earned during the period by the maximum offering price per share on the last day of the period.

³ Price-to-book ratio is a valuation ratio of a stock's market value compared to its book value.

⁴ Price-to-earnings ratio (P/E) is a stock's current price divided by the company's trailing 12-month earnings per share from continuous operations.

⁵ Dividend yield is a weighted-sum of the annualized dividends of the index components divided by the most recent index value. Annualized dividends are determined using a sum of all dividend announcements during the previous 12 months. Dividend yield is that of the MSCI Japan Index and is the rate of income generated by a stock in the form of dividends. The dividend yield of the index should not be considered the dividend yield of the fund.

Risks:

Investing involves risk, including the possible loss of principal. Stocks may decline in value. Foreign investing involves greater and different risks than investing in U.S. companies, including currency fluctuations, less liquidity, less developed or less efficient trading markets, lack of comprehensive company information, political instability and differing auditing and legal standards. The fund's use of forward currency contracts may not be successful in hedging currency exchange rates changes and could eliminate some or all of the benefit of an increase in the value of a foreign currency versus the U.S. dollar. Funds investing in a single industry, country or in a limited geographic region generally are more volatile than more diversified funds. Investing in derivatives entails special risks relating to liquidity, leverage and credit that may reduce returns and/or increase volatility. Performance of the Fund may diverge from that of the Underlying Index due to operating expenses, transaction costs, cash flows, use of sampling strategies or operational inefficiencies. An investment in this fund should be considered only as a supplement to a complete investment program for those investors willing to accept the risks associated with the fund. Please read the prospectus for more information. See the prospectus for details.
